Technical Skills

Operating Systems: Windows 10/11, macOS, Linux (basic)

Microsoft 365 / Admin: Outlook, Teams, SharePoint, OneDrive, O365

Networking: DHCP, DNS, TCP/IP, VPN, LAN/WAN basics

Hardware Support: PC/Mac/Linux troubleshooting, printers, scanners, peripherals, device setup

Programming & Scripting: JavaScript/TypeScript, Python, SQL, Bash, PowerShell (basic), C#, C++

Automation & Tools: Power BI Automate, Tableau, RStudio, Excel, JSON, APIs

Frameworks: FastAPI, Node.js, Next.js, React, Vite

Databases: PostgreSQL (SQL), MongoDB (NoSQL)

Cloud: AWS, Google Cloud Platform (GCP)

Soft Skills: Customer support, communication, documentation, troubleshooting, collaboration

Experience

Terravan Solar

June 2023 – May 2024

Software Engineer Intern

- Assisted engineers with device setup, firmware updates, and diagnosing communication issues between ESP32 and Android devices.
- Troubleshoot connectivity, configuration, and data transmission problems using serial tools and JSON debugging.
- Created internal documentation to support onboarding and knowledge transfer across the engineering team.
- Participated in Agile sprints and collaborated cross-functionally to resolve issues quickly.

Amazon Sortation Warehouse — Part-Time Associate

Nov 2020 – Aug 2021

- Maintained workflow accuracy by interpreting digital sorting instructions and resolving scan errors.
- Communicated with leads to resolve operational issues in a high-volume, fast-paced environment.
- Followed safety and equipment procedures, supporting warehouse technology and device usage.

ARCO AMPM — Part-Time Cashier

Jul 2018 – Oct 2020

- Provided customer support and resolved issues related to transactions, devices, and store equipment.
- Performed cash handling, register balancing, and incident reporting with accuracy.
- Addressed and de-escalated customer concerns with clear communication and professionalism.

Projects

QR8 – Automation-Ready QR Code System

2025 – Present

- Built a modular full-stack application using React, Vite, and FastAPI for generating structured QR code data.
- Implemented validated backend endpoints and clean JSON responses suitable for business automation.
- Developed a responsive UI with customizable QR options such as gradients, icons, and logos.

Alky – Transaction Tracking & Reporting Tool

2025 – Present

- Designed a personal finance tool supporting categorized expense tracking and account management.
- Built dashboards using Recharts to display user-friendly budget and spending summaries.
- Implemented efficient SQL queries and session handling for a smooth user experience.

Data Analysis & Visualization Projects

2024 – 2025

- Created analytical dashboards in Tableau and RStudio for churn, medical, and social analytics datasets.
- Cleaned, validated, and transformed datasets using Python, SQL, and Excel.
- Produced clear, insight-driven visualizations for academic and personal research.

Education

California State University – Long Beach

May 2025

B.S. in Computer Science

Relevant Coursework

Data Visualization, Software Development with Frameworks (ASP.NET MVC + Razor), Databases, Networks, Data Structures, Algorithms, Operating Systems
