Technical Skills

Operating Systems: Windows, macOS, Linux (basic)

Microsoft 365: Outlook, Teams, SharePoint, OneDrive, O365 Admin, MFA, VPN

Networking: TCP/IP, DHCP, DNS, LAN/WAN troubleshooting

Hardware: PC/Mac hardware, printers, scanners, mobile devices (iOS/Android)

Automation & Tools: Power Automate, JSON, APIs, Excel

Scripting & Tools: Python, SQL, Bash, PowerShell (basic), Git, Jira

Soft Skills: Customer support, communication, documentation, multi-tasking

Experience

Terravan Solar

June 2023 – May 2024

Software Engineer Intern

- Provided troubleshooting support for embedded hardware/software systems, including device configuration and log review.
- Diagnosed communication and connectivity issues using JSON serial data between Arduino ESP32 and Android devices.
- Collaborated with engineers to resolve technical issues, track bugs, and improve system reliability.
- Created internal documentation for troubleshooting procedures and device setup.

Amazon Sortation Warehouse — Associate

Nov 2020 – Aug 2021

- Coordinated workflows and followed detailed instructions in a high-volume logistics environment.
- Supported operational continuity by identifying workflow issues and communicating with leads.
- Maintained accuracy and safety while handling equipment and completing assigned tasks.

ARCO AMPM — Cashier

Jul 2018 – Oct 2020

- Delivered customer support by resolving inquiries and assisting with POS transactions.
- Troubleshoot basic terminal and equipment issues during daily operations.
- Maintained professionalism while communicating with a wide range of customers.

Projects

QR8 – Full-Stack QR Automation Tool

2025 – Present

- Built a React + FastAPI application capable of generating structured QR code data formats (URL, WiFi, text, vCard).
- Created backend API endpoints with proper validation and structured responses suitable for automation workflows.
- Implemented UI components for easy configuration and troubleshooting of QR output parameters.

Alky – Transaction Tracking Tool

2025 – Present

- Developed a financial tracking system featuring categorized transactions, reporting views, and database operations.
- Implemented user-friendly UI flows and improved usability through clean React components.

Data Analysis & Visualization Projects

2024 – 2025

- Created dashboards in Tableau and RStudio to visualize trends and interpret datasets.
- Cleaned and transformed data using Python, SQL, and Excel for reporting.

Education

California State University – Long Beach

May 2025

B.S. in Computer Science

Relevant Coursework

Operating Systems, Networks, Software Development with Frameworks (ASP.NET MVC + Razor), Databases, Data Visualization
