Education

California State University – Long Beach

May 2025

B.S. in Computer Science

Technical Skills

Languages: TypeScript, JavaScript, Python, C++, C#, HTML, CSS

Frameworks & Libraries: Next.js, React, Vite, Node.js, FastAPI, Prisma, ASP.NET (MVC, Razor), TailwindCSS

Databases: PostgreSQL (SQL), MongoDB (NoSQL), MySQL

Tools & Practices: Git, GitHub, Jira, Figma, RESTful APIs, Agile/Scrum

Cloud & Systems: AWS (S3, RDS), Google Cloud Platform (GCP), Vercel, OpenGL, GLSL

Experience

Terravan Solar

June 2023 – May 2024

Software Engineer Intern

- Developed embedded system features enabling real-time battery diagnostics by parsing JSON data between Arduino ESP32 and Android devices.
- Integrated and optimized the C++ JdbBms library to establish reliable communication with JBD Battery Management Systems (UART) for live metric access.
- Collaborated with engineers in Agile sprints to implement new firmware features, debug hardware issues, and improve long-term maintainability.

Projects

QR8 – Customizable QR Code Generator

Nov 2025 – Present

- Built a full-stack web app for generating dynamic QR codes supporting URL, WiFi, vCard, and text formats using React, TypeScript, and FastAPI.
- Designed backend endpoints in FastAPI for generating, encoding, and customizing QR data with modular API routes and JSON-based responses.
- Implemented advanced UI features such as gradient backgrounds, color themes, and embedded logos for fully personalized designs.

Alky – Personal Finance Web App

Aug 2025 – Nov 2025

- Designed and developed a personal finance tracker using Next.js, TypeScript, and PostgreSQL (Prisma) to manage accounts and track categorized spending.
- Implemented secure authentication with NextAuth and created dashboards using Recharts and TailwindCSS for visual insights into income and expenses.
- Focused on backend scalability and clean frontend architecture to ensure performance and maintainability across user sessions.

SRB Construction and Engineering Services Website

June 2024 – Jan 2025

- Developed a responsive company website using Next.js and TailwindCSS to strengthen the client's digital presence and accessibility.
- Conducted client meetings, built prototypes in Figma, and refined design iterations based on feedback.

DROCSID – CSULB Senior Capstone Project

Jan 2024 – Dec 2024

- Built a real-time chat application with file sharing, authentication, and REST APIs using Next.js and Node.js.
- Integrated PostgreSQL via Prisma for persistent message storage and efficient metadata retrieval.
- Collaborated in an Agile team using Jira and GitHub to plan sprints, review code, and ensure system reliability.
