Education

California State University – Long Beach

May 2025

Bachelor of Science in Computer Science

Technical Skills

Programming Languages: JavaScript, TypeScript, Python, C#, C++, HTML, CSS
Frameworks & Libraries: React, Next.js, Node.js, FastAPI, ASP.NET MVC (Razor), Vite
Databases: PostgreSQL (SQL), MongoDB (NoSQL), MySQL
Web & APIs: RESTful APIs, JSON, NextAuth
Tools: Git, GitHub, Jira, Figma, Bash
Cloud Platforms: AWS, Google Cloud Platform (GCP)

Experience

Terravan Solar

June 2023 – May 2024

Software Engineer Intern

- Developed embedded system features to support real-time battery diagnostics using JSON-based communication between Arduino ESP32 and Android devices.
- Integrated and refined C++ communication libraries to enable reliable access to battery management system metrics.
- Assisted in debugging firmware issues and validating feature behavior across development iterations.
- Collaborated with engineers in Agile sprints, contributing to documentation and structured problem-solving.

Amazon Sortation Warehouse — Part-Time Associate

Nov 2020 – Aug 2021

- Maintained workflow accuracy by interpreting digital sorting instructions and resolving scan errors.
- Communicated with leads to resolve operational issues in a high-volume, fast-paced environment.
- Followed safety and equipment procedures, supporting warehouse technology and device usage.

ARCO AMPM — Part-Time Cashier

Jul 2018 – Oct 2020

- Provided customer support and resolved issues related to transactions, devices, and store equipment.
- Performed cash handling, register balancing, and incident reporting with accuracy.
- Addressed and de-escalated customer concerns with clear communication and professionalism.

Projects

QR8 – Full-Stack QR Code Generator

2025 – Present

- Built a full-stack web application using React, Vite, and FastAPI to generate structured QR codes (URL, WiFi, vCard, text).
- Designed REST API endpoints with clean input validation and JSON responses.
- Implemented modular frontend components focused on usability and maintainability.

Alky – Personal Finance Tracking Application

2025 – Present

- Developed a full-stack finance tracking web app using Next.js, TypeScript, and PostgreSQL.
- Implemented secure authentication and session handling for user-specific data access.
- Created interactive dashboards to visualize spending data and financial trends.

SRB Construction and Engineering Services Website

June 2024 – Jan 2025

- Developed a responsive company website using Next.js and TailwindCSS to strengthen the client’s digital presence and accessibility.
- Conducted client meetings, built prototypes in Figma, and refined design iterations based on feedback.

DROCSID – CSULB Senior Capstone Project

Jan 2024 – Dec 2024

- Built a real-time web application with messaging, file sharing, and authentication using Node.js and React.
- Integrated SQL-based persistence for storing user and application data.
- Worked in a team environment to troubleshoot issues, implement new features, and maintain documentation.
